

Are you looking for a solution to the difficulty and expense of gaining CPR and other medical training for your staff? Would you like to eliminate the bother of tracking and scheduling employees for training? Or would you like to reduce the cost of travel, tuition, and materials?

CPRx, Inc. has the perfect solution!

You choose the classes and we will bring everything right to your office. No more planning challenges, conflicts, travel time, or worry about whether your certifications are current. We will track your employee's certifications and we will contact you when it is time to recertify. New employees who are hired after your office group certification can be conveniently enrolled in one of our periodic community classes.

CPRx, Inc. is a full service on-site medical training company serving Indiana and its surrounding states. Owner LuAnn Chamberlin has over 30 years experience in the medical field, and the staff at CPRx, Inc. have earned Masters and Bachelors degrees in education, Paramedic/fire fighters, Medical Assistants, and EMT-B. Our employees are excellent teachers with years of experience and have superior medical credentials. We work around your busy schedule to bring quality medical training right to your door!

We provide American Heart Association CPR and ACLS training, and customized medical training, conveniently conducted in your office in the following areas:

Client Testimonials

"CPRx has been my best resource for clinical education for our large physician office! LuAnn and Terri, as owners and educators have provided me with so many training venues to include: ACLS and BLS, basic EKG, IV Starts, Medical Terminology, Phlebotomy, Vital Signs and so much more. What is so refreshing is they design the courses to specifically address my company's individual and unique needs. All student evaluations have been excellent and LuAnn and Terri's clinical expertise and flexibility has been much appreciated and such a relief. Health care is complicated and it is wonderful to have CPRx on board to help us with the necessary certifications and training we need to ensure our associates are providing the best service to our patient's and families."

Shelby P. Slowik, Senior HR Advisor, The Care Group, LLC

"I felt at ease asking questions. Information presented in a clear manner and I felt confident being able to practice each skill with guidance from instructors."

Urology of Indiana

"They were fabulous!"

Urology of Indiana North Meridian Office

"Excellent Instructors!"

Southeast Family Physicians

"Very knowledgeable and organized!"

Murphy's Landing Dental

"This has truly been the most informative training I have been through!! Thanks!"

TX: Team

"Urology of Indiana utilizes CPRx for our on-site CPR training/re-certification. The organization is a pleasure to work with in arranging these meetings. With 19 locations and over 200+ employees, it is extremely beneficial to offer these courses to our staff on site. CPRx is very accommodating of our needs. We have set up several classes throughout the year at different locations and times and CPRx has been able to meet our requests. One of our nurses stated after her course that in all of her years of nursing this was the best instruction she had ever received. She finally feels 100% prepared to conduct CPR if the need should arise. Additionally, CPRx sends the cards directly to HR. This allows us to make copies for our files and then deliver to staff. This saves us time avoiding having to locate staff for a current copy of the card. I highly recommend CPRx for your training needs."

Beth Jensen, HR Director, Urology of Indiana, LLC

"CPRx is a great company. They have been very helpful with the scheduling of my employees for BLS and ACLS training. The customer service is excellent. I have had a wonderful experience during the scheduling process. They are prompt to return my calls and e-mails and they are very pleasant and professional in person. I cannot say enough about this company. Our employees really enjoyed the BLS program that was done here at our office. I personally attended the ACLS training and I found it to be a great class. ICVC will continue to use CPRx for all of our certification needs. It is also nice to know that if there is ever a need for our nursing staff to brush up on their skills, CPRx is able to provide those training classes. Once again, I am thrilled that our company has found CPRx."

Adrian Ferrentino, Clinical Manager, Indiana Cardiac and Vascular Consultants

CPRx Is Your Prescription for Medical Training

ACLS Provider Recertification Course

Course Description: The American Heart Association's Advanced Cardiovascular Life Support course is totally redesigned for healthcare providers who either direct or participate in the resuscitation of a patient, whether in or out of hospital. Through the ACLS course, providers will enhance their skills in the treatment of the adult victim of a cardiac arrest or other cardiopulmonary emergencies. ACLS emphasizes the importance of basic life support CPR to patient survival; the integration of effective basic life support with advanced cardiovascular life support interventions; and the importance of effective team interaction and communication during resuscitation.

ACLS is based on simulated clinical scenarios that encourage active, hands-on participation through learning stations where students will practice essential skills individually, as part of a team, and as team leader. Realistic simulations reinforce the following key concepts: proficiency in basic life support care; recognizing and initiating early management of peri-arrest conditions; managing cardiac arrest; identifying and treating ischemic chest pain and acute coronary syndromes; recognizing other life-threatening clinical situations (such as stroke) and providing initial care; ACLS algorithms; and effective resuscitation team dynamics.

Course Length: 4 1/2 hours, including breaks

Card Type: American Heart Association ACLS card valid for 2 years

Basic ECG

Course Description: Students will be taught what an ECG is, how to perform an ECG on a patient, how to identify and correct artifacts, basic rhythm interpretation, and patient care.

Course Length: 4 hours

Certificate Type: Certificate of Completion from CPRx, Inc.

Blood Borne Pathogens/OSHA

Course Description: This course is invaluable to maintaining the safety of your employees and your patients. All OSHA Guidelines will be covered including, PPE, waste disposal, diseases, and safety equipment use.

Course Length: 2 hours

Certificate Type: Certificate of Completion from CPRx, Inc.

BLS CPR for Healthcare Providers

Course Description: This American Heart Association BLS (sometimes referred to as BCLS) for Healthcare Providers CPR/AED Initial/Renewal Course is designed for healthcare providers or aspiring healthcare providers who care for patients in a wide variety of settings, both in and out of hospital. The course includes the following:

- > Initial patient assessment
- > Rescue breathing with a face-shield, pocket face mask, and bag valve device
- > One and two rescuer CPR for the adult, child, and infant with and without an advanced airway
- > Use of an automated external defibrillator (AED) on adults and children
- > Relief of choking with a blocked airway for responsive and unresponsive victims of all ages
- > Special situations for healthcare providers

Course Length: 2 - 3 hours

Card Type: American Heart Association BLS for Healthcare Providers CPR/AED course completion card valid for 2 years.

Heartsaver (Adult, Child, Infant CPR/AED)

Course Description: This American Heart Association Heartsaver AED course was the first in the nation to combine hands-on AED instruction with adult CPR training. The course teaches the basic techniques of adult, child, and infant CPR and use of an AED. Students also learn to use barrier devices in CPR and giving first aid for choking in the responsive victim. The course teaches how to recognize the signs of 3 major emergencies: heart attack, stroke, and choking.

Course Length: 2 1/2 hours

Card Type: American Heart Association Heartsaver AED course completion card valid for 2 years.

Heartsaver Pediatric First Aid with CPR & AED

The American Heart Association is the recognized authority in resuscitation science and training. The American Heart Association and OSHA have formed an alliance to help raise awareness about heart disease and stroke.

Course Description: The Heartsaver Pediatric First Aid course teaches how to manage illness and injuries in a child in the first few minutes until professional help arrives. First aid basics, medical, injury, and environmental emergencies are taught along with CPR and AED.

Course Length: 3 to 4 hours

Card Type: American Heart Association Heartsaver Pediatric First Aid + CPR + AED course completion card valid for 2 years.

IV Initiations

Course Description: This course is intended for employees who have to start an IV but not push medications. Students will learn the basics of the equipment and supplies that are necessary to start an IV and how to use them correctly. The course will cover how to find the best veins, tie a tourniquet, insert the angiocath, watch for the flash, flush, draw blood, wrap, and provide patient care. We will also cover proper OSHA guidelines for this procedure.

Course Length: 4 hours

Certificate Type: Certificate of Completion from CPRx, Inc.

Medical Terminology

Course Description: This course is valuable for any employee in the medical field. With the use of lecture, puzzles, quizzes, and video you can learn over 350 elements and the skills to form and understand words. Front office or back, this is a great class.

Course Length: 24 hours -- typically taught four hours per week for six weeks.

Certificate Type: Certificate of Completion from CPRx, Inc.

Phlebotomy Training

Course Description: This class will cover the techniques of drawing blood using a vacutainer and a butterfly, identifying and using the correct tubes for the labs ordered, OSHA guidelines, labs for actual drawing of blood, and patient care.

Course Length: 8 hours usually taught in two 4 hour days

Certificate Type: Certificate of Completion from CPRx, Inc.

The Basic Tuberculosis and Skin Test Course

Description: This course is designed for, but not limited to, licensed healthcare providers who administer, read, and record Mantoux tuberculin skin tests. Persons who successfully complete the course will receive a validation card from The American Lung Association.

Course length: 3-4 hours

Target Audience: Interested persons involved in tuberculosis-related activities.

Prerequisites: None

Criteria to receive a validation card for Basic TB and Skin Test Course:

- > Complete the Basic TB and Skin Test Course
- > Pass a Post-test of twenty-five (25)-questions with a score of 80% or above
- > Successfully read the reactor models within two (2) millimeters of induration
- > Demonstrate competency in the administration of the Mantoux tuberculin skin test
